ENVIROMENTAL POLICY

Maintaining the quality of the environment is of high priority to us. We are committed to safeguarding the environment and the prevention of pollution through the implementation of an effective Environmental Management System (EMS). This environmental policy is the foundation of the EMS and states the company's commitments and principles to sound environmental performance through the provision of a frame work for action and the setting of environmental objectives and targets.

It is our policy to:

- Execute our activities in compliance with environmental laws and regulations.
- Enhance proper waste management through measures that encourage minimization, recycling, and reuse of process waste.
- Co-operate with federal, state, and local governments and other relevant stakeholders in sharing/analyzing emerging environmental issues, finding solutions to environmental problems, and developing cost-effective, scientifically based environmental standards.
- Set objectives/targets and performance standards to promote continual improvements in environmental performance and the prevention of pollution.
- Encouraging individual responsibility for sound environmental management and the provision of environmental training programme for our employees and contractors.
